## Velodyne Lidar

# HDL-64E ss

HIGH DEFINITION REAL-TIME 3D LIDAR

#### HDL-64E

## Automotive Mining Mapping Geology Urban Planning R&D

#### **Real-Time 3D Lidar**

The HDL-64E S3 is Velodyne's high resolution and performance Lidar sensor product. It captures high definition, real-time 3D information about the surrounding environment. It is ideal for applications such as autonomous vehicle navigation, 3D mapping and surveying plus industrial automation.

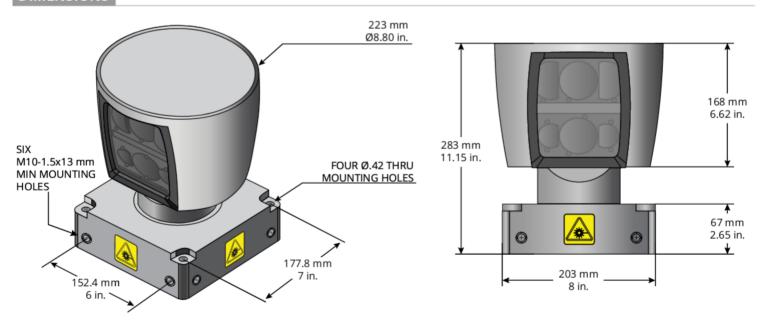

#### Wide Field of View and High Frame Rate

The HDL-64E S3 provides excellent resolution and field of views to generate a wealth of data about the surrounding environment. It utilizes 64 Lidar channels with a vertical field of view of 26.9° and delivers a real-time 360° horizontal field of view with its patented rotating head design. The rotation rate is user-selectable from 5 Hz to 20 Hz to enable the user to determine the density of data points generated by the Lidar sensor. The HDL-64E S3 generates a point cloud of up to  $\sim$ 2,200,000 points per second with a range of up to 120 m. The HDL-64E S3 is designed to operate over a wide temperature range (-10°C to +60°C) and challenging environments to support diverse operating conditions and applications.

HDL-64E S3

#### DIMENSIONS

velodynelidar.com

### **High Definition Lidar Sensor**

The HDL-64E S3 provides high definition 3 dimensional information about the surrounding environment.

	Specifications:
Sensor:	<ul> <li>64 channels</li> <li>Measurement Range: Up to 120 m</li> <li>Range Accuracy: Up to ±2 cm (Typical)<sup>1</sup></li> <li>Field of View (Vertical): +2.0° to -24.9° (26.9°)</li> <li>Angular Resolution (Vertical): 0.4°</li> <li>Field of View (Horizontal): 360°</li> <li>Angular Resolution (Horizontal/Azimuth): 0.08° – 0.35°</li> <li>Rotation Rate: 5 Hz – 20 Hz</li> </ul>
Laser:	<ul> <li>Laser Product Classification: Class 1 Eye-safe</li> <li>Wavelength: 903 nm</li> </ul>
Mechanical/ Electrical/ Operational	<ul> <li>Power Consumption: 60 W (Typical)<sup>2</sup></li> <li>Operating Voltage: 12 V – 32 V</li> <li>Weight: 28 lbs. (12.7 Kg) (without cabling)</li> <li>Dimensions: 215 mm Diameter x 283 mm Height (Base: 203 mm x 203 mm)</li> <li>Operating Temperature: -10°C to +60°C<sup>3</sup></li> <li>Storage Temperature: -40°C to +85°C</li> </ul>
Output:	• 3D Lida r Data Points Generated:  - Single Return Mode: ~1,300,000 points per second  - Dual Return Mode: ~2,200,000 points per second  • 100 Mbps Ethernet Connection  • UDP Packets Contain:  - Time of Flight Distance Measurement  - Intensity Measurement  - Rotation Angles  - Synchronized Time Stamps (µs resolution)  • GPS: \$GPRMC NMEA Sentence from GPS Receiver (GPS not included)

63-9194 Rev-K

#### For more details and ordering information, contact Velodyne Sales (sales@velodyne.com)

- 1. Greater than or equal to 80% of channels at ambient wall test; remaining channels better than or equal to 5 cm.
- 2. Operating power may be affected by factors including but not limited to range, reflectivity and environmental conditions.
- 3. Operating temperature may be affected by factors including but not limited to air flow and sun load.
- 4. Configuration dependent.
